

Spinning Poles

For flags with grommets:

- Attach the upper left grommet to the metal hook at the top of the pole.
- Next, slide the clear plastic ring up the bottom of the flagpole so that it meets with the lower left grommet of the flag.
- Match the grommet with the hole in the ring.
- Twist the screw on just enough so that the ring can still rotate around the pole.

For flags with a sleeve:

- Find the tab located on the inside of the sleeve (upper left corner of the flag).
- Slide the flag up the pole.
- Attach the tab to the metal hook.
- You may have a clear plastic mounting ring that was included with your pole. This ring is not needed for a sleeved flag.
